

Dynamic Positioning - Basic

PURPOSE

The purpose of this course is to provide Dynamic Positioning (DP) training to ships' officers to a standard adequate to fulfil the requirements of the industry and of the various legal bodies and institutions involved.

ACCEPTING AUTHORITY

Nautical Institute, London.

CONTENT

The training is based on the programme as outlined by the Nautical Institute Scheme of Training which follows the recommendations contained in The International Maritime Organisation (IMO) and The International Marine Contractors Association (IMCA) guidelines.

- Outlining the national and international rules and regulations valid for Dynamic Positioning operations
- Practise the basic functions of the Dynamic Positioning systems by means of the Marine Technologies DP simulator
- Demonstrate general knowledge of the use of Dynamic Positioning Systems and the limitations of these systems
- Safety issues for vessels in Dynamic Positioning operation
- Position reference systems

OBJECTIVES

The completion of this course combined with documentation of completion of the required 30 days of experience in DP operation will qualify the participant to join the Dynamic Positioning Advanced Course.

The aims include:

- To provide training in the subject Dynamic Positioning to the standards specified by international regulatory authorities and to the standards recognised by institutions in the industry
- To submit the required theoretical knowledge in the use of Dynamic Positioning systems which are installed onboard DP vessels
- To apply practical training in the use of Dynamic Positioning systems by means of simulation equipment
- To give each participant sufficient knowledge to use a DP system on any DP vessel.
- To obtain knowledge of the rules and regulations under which, according to national and international authorities, such operations should be performed

ADMISSION REQUIREMENTS

No requirements

DURATION

Five days

PARTICIPANTS

Maximum eight

LANGUAGE

The course will be conducted in English

Maersk Training Svendborg A/S

Maersk Training – ELCOME Dubai

Maersk Training

Maersk Training has been providing specialist learning to specific industries for more than three decades. The merger of the former Maersk Training Centre and Svitser Safety Services in 2010 broadened the already impressive portfolio which companies in the maritime, oil & gas, terminals and wind power industries in particular, have benefited from since 1978.

As the first training establishment to be awarded a DNV Certificate of Excellence, we now have branches in Newcastle and Aberdeen in Britain, Stavanger in Norway, Dubai, Nigeria and India as well as in Esbjerg and at the headquarters in Svendborg, Denmark.

Further branches are planned to open over the next four years as part of the group policy of taking training to precisely where it's needed. Our new global company therefore provides easy access to specialist training in terms of its three core industries as well as a range of products which aim to increase the core values of safety and efficiency. The opening of what has been described as the world's most advanced sea-industry based simulation centre, MOSAIC, has further enhanced the company's reputation for being innovative and responsive to the growing needs of the industry.

All this is in order to provide, a better learning experience.
